The low-down on Burger Boat — from boatyard to boardroom

CARBON RIGID INFLATABLE

► **Producer:** CrossCurrent Marine
 ► **Web:** www.crosscurrentmarine.com

The Crosscurrent U.23 Carbon RIB is constructed of proprietary carbon and Kevlar epoxy composite. Lightweight and durable, it is capable of achieving speeds of 45kt. The RIB has a two-seat driving console with integrated leaning post, and a rear seat lounge and leaning post, which convert to a sun bed, or bench and table. The U.23 also features an epoxy hard-top and a telescopic swim ladder.

LEATHER VENETIAN BLINDS

► **Producer:** Oceanair
 ► **Web:** www.oceanair.co.uk

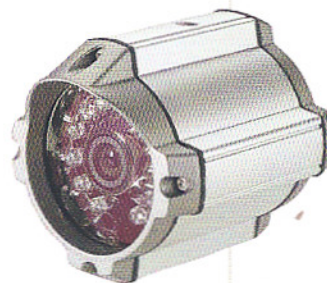

As the latest evolution of Oceanair's SkyVenetian range, the leather venetian blinds have an improved internal slat structure that increases stability and reduces slat twisting and warping.

UNDERWATER INSPECTION CAMERA

► **Producer:** Reinaert Electronics
 ► **Web:** www.reinaertelectronics.nl

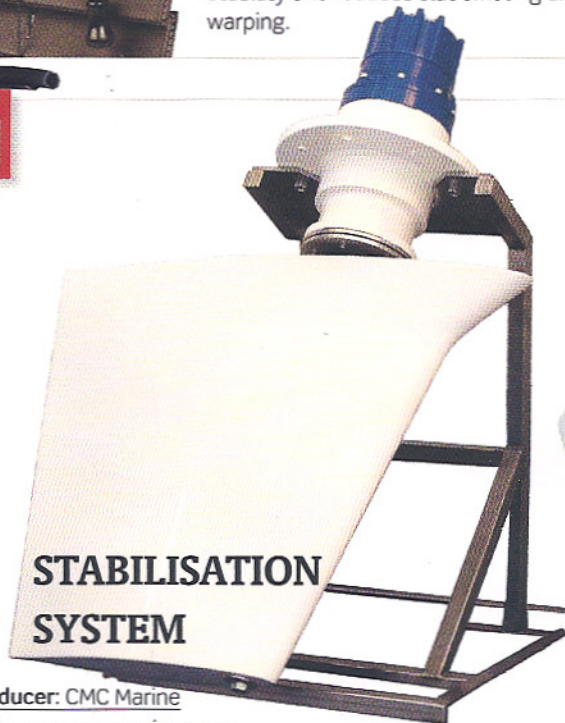

The Fox 2410 underwater inspection colour and IR camera is waterproof to IP 66. Each unit is 30m depth tested and offers a horizontal resolution of greater than 480TV lines. A 6mm lens provides a horizontal field of view of 53° in water.

STABILISATION SYSTEM

► **Producer:** CMC Marine
 ► **Web:** www.cmcmarine.com

Stabilis Electra is a fin stabiliser that uses a DC permanent magnet electrical motor to improve on the limits of a hydraulically based system. To overcome induced torque on components, an epicyclical reduction gear is mounted at 90° between the electrical motor and fin shaft, which also acts as a mechanical multiplier of the torque from the motor to the shaft.

TYPE-APPROVED DEEP-SEA RADARS

► **Producer:** Sperry Marine
 ► **Web:** www.sperrymarine.northropgrumman.com

The VisionMaster FT radar systems are a suite of navigation systems designed to improve situational awareness for ship's watch officers. Upgraded since its launch, the suite now meets recent requirements from the International Electrotechnical Commission and the International Maritime Organisation.

Primarily aimed at commercial vessels and the upper end of the yacht market, the scalable suite features marine radars, chart radars, information systems and workstations.
